

GRANT APPLICATIONS & CAPITAL SOURCING

Cooperative Research Centre Applications

“CRCs are our strongest capability area. Since 2006 we have raised \$157 million from the CRC Program.”

Introduction

The CRC application process is increasingly competitive, with only 23% of CRC applicants being funded in the last round. Successful bids have become more professional and often rely on external expertise and support. CIS is the most successful service provider in having CRCs progress to stage 2 and being successfully funded. We have been involved in CRCs with a combined total value of \$1.6 billion and successful funding requests of \$157 million.

Our process is customised to meet client needs; we support each aspect of the application process, from assistance with the strategic direction, managing bid activities to leading the completion of key components of the bid such as the impact tool, utilisation and commercialisation strategy, education and training program, financial tables, governance arrangements and participant engagement which requires management of up to 60-70 participants with significant cash and in-kind contributions.

CRCs are complex and time consuming. CIS has invested in specialist IP (such as templates and tools to capture and produce information in accordance with the application requirements) to increase the competitiveness and efficiency of the CRC grant application process.

Our Projects

Our clients projects include:

- ◆ *Contamination Assessment and Remediation of the Environment (CARE CRC) \$29,100,000*
A CRC collaboration set up to devise new ways of dealing with and preventing contamination of soil, water and air.
- ◆ *Young People, Technology and Wellbeing (YAW CRC) \$27,467,000*
Disseminating knowledge around young people’s technology use and how it may be harnessed for improving cyber safety, mental health and wellbeing.
- ◆ *Remote Economic Participation (REP CRC) \$32,500,000*
A research centre that aims to halve the unemployment, welfare and other differences between Aboriginal people and other Australians.
- ◆ *Cancer Therapeutics CRC \$37,691,000*
A CRC that focuses on discovering and developing novel small molecule therapies for treating cancer.
- ◆ *Biomarker Translation CRC \$30,599,000*
A CRC that focuses on the development of diagnostics and therapeutic agents for the treatment of cancer and autoimmune diseases.
